## OIL and GAS NEWS

W. B. Hume of the Dundee Petroleum Company, has returned from a business trip to Tulsa.

W. B. Johnson was absent on a business trip to Muskogee yesterday.

#### Near Burneyville.

Oklahoma Star in section 17-1 west in Love County, is in blue shale, at 2370 feet.

#### Reached Top of Sand.

Gates Oil Company No. 7 Jackson, in 15-4-3, reached the top of the sand at 1297 and was drilled in yesterday.

#### At Loco.

Golden Gate Oil Company in 17-3-3 in the Loco field, is landing the 8-inch at a depth of 680 feet.

#### Big Capital Stock.

It is said that papers are being made out here for the incorporation of a company with a half million

capital stock. This company has a rig up in the Newport Company in section 29-3-1w, where its first well will be drilled.

E. H. Royer of the Dundee Petroleum Company, was here yesterday from Marshall County, where he is directing the operations of his company.

#### Owns Land Here.

J. L. Murray of Coalgate, who owns a nice body of land near Lone Grove in this county, is here looking after his interests and investigating his prospects in the oil business.

#### After Long Absence.

Mr. and Mrs. Walter Critchlow are here from West Virginia, where they spent the summer. They are now at their home on North Washington Street. Mr. Critchlow is one of the early investors at Healdton and has production in that field.

#### Ready to Drill.

The Ardmore well in 8-4-3 on the Walker tract, has been underreaming and has made no progress for several days. The depth is 1550 feet. The well is ready for deeper drilling and a total depth of at least 2,000 feet will be drilled.

#### Southwest of Ardmore.

L. W. Marks of Edmond, is in the city looking after the interests of the Spectator Petroleum Company, of which company he is a director. Mr. Marks is encouraged over the prospects of finding oil and states that his company will drill a good test.

#### Heavy Gas Production.

B. A. Simpson et al, on the Ingram 20 acres in the center of 15-4-3, have not been able to do very much with well No. 1 yet on account of the heavy production of gas. It has 100 feet of oil sand and will make a good producer when it is in shape for producing.

#### Northwest of Lone Grove.

Perry Fox of the contracting firm of Fox & Lamb, was in the city yesterday from the Haskell-Sinclair well in 11-4-1, northwest of Lone Grove. Drilling has not been resumed on that well but casing will soon be hauled out and deeper drilling will be done. The well is now at a depth of 1514 feet.

#### Location in Sixteen.

The Dundee-Crystal companies have made an interesting location on the

## VULCANIZING

We want your tires and tubes to repair and will do good work.

The

Frederickson Tire Co.

New Post Office is Opposite us.

## SIMPLEX PULLS SUCKER RODS AND LETS THEM IN.

Without a Team. Without an Extra Man. Without Delay

Saves cost of men and teams, saves trouble and delay in securing services of men and teams. Saves all production lost by delay. Your regular lease man does the work alone. The SIMPLEX costs less than half what any other standard machine would cost you. Let us tell you about it, and have our man, now in your field, demonstrate.

Carter farm in section 16-4-3. The location is in the northwest corner of the northeast quarter of the section. L. Teatsworth will do the drilling. A rig will be moved in from another location and it is expected that drilling operations will be begun at once.

#### Frank Cullinan Here.

Frank Cullinan, second vice president of the Producers Oil Co., and general superintendent of all production of this company, was at Healdton Friday accompanied by his secretary. His headquarters are at Tulsa. Mr. Cullinan is a brother of the old president of the company, J. S. Cullinan, who afterward became president of the Farmers Petroleum Company, and who is one of the best known oil men in the United States.

#### Eliminating Water.

A report from the Gypsy Oil Company's well on the Mathe Morris lease in section 28-2-3 states that the drill has reached a total depth of 1818 feet, although that depth seems a little too great. The top of the gas producing sand was reached at 1765. The hole is full of water and the gas is making but a small showing through that much water. The casing is being underreamed and the contractor will dry up the hole.

#### Company Reorganized.

The Spectator Petroleum Company which has a well in 6-3-1 east in Carter County, to a depth of about 1,000 feet, has been reorganized. James Harrington has retired from the presidency and Frank E. Buell of the Hollis Lumber Company of Edmond, Okla., has been elected to succeed him. It is stated that drilling will be resumed on the well and that it will be pushed to completion. The formations here are said to be looking favorable, and the owners are encouraged.

#### Drilling Through Gas Sand.

The state corporation commission has agreed for the Lewcinda Oil Company and Wirt Franklin to proceed with the drilling in of their well in 29-2-3. It is said that the gas has been kept under control, although it is one of the largest gas wells ever drilled in the state. The drill penetrated the sand Friday to a depth of 38 feet; the gas production was increased by the drilling. The owners plan to drill a ten-inch hole through the sand and will then set the 8-inch casing. It is probable that the gas sand will be drilled through today.

#### TWIN STATE SELLING OIL.

Begins Tomorrow to Make Daily Runs to Ardmore Refining Co.

Twin State Oil Company has closed a deal with the Ardmore Refining Company, by which it will sell to the refinery at the market price of Healdton crude from 2,000 to 2,500 barrels a day. Delivery of the oil will be begun tomorrow. The Magnolia has been getting this oil, which will now be delivered to the local people. The Crystal Oil Company, which owns a one-half interest with the Twin State Oil Company is delivering its oil to steel storage while the Twin State is selling.

#### FOR QUICK SALE.

One hundred shares in the Spectator Petroleum Company, drilling in 6-5-1 east. See L. W. Marks at Randol hotel.
